

## Grass Cross-reactivity

FAMILY	SUBFAMILY	TRIBE	GENUS	COMMON NAME	POLLINATION	
Poaceae	Chloridoideae	Chlorideae	<i>Cynodon</i>	Bermuda	Spring – Fall	
		Agrostideae	<i>Agrostis</i>	Redtop	Summer – Fall Spring – Fall	
			<i>Phleum</i>	Timothy		
	Phalarideae		<i>Anthoxanthum</i>	Sweet Vernal	Spring – Fall Spring – Summer	
			<i>Phalaris</i>	Canary Grass, Reed		
	Pooideae	Aveneae	<i>Avena</i>	Oat Grain	Spring – Summer	
		Poeae		<i>Bromus</i>	Brome	Spring – Summer Spring – Fall Spring – Summer Spring – Fall Spring – Fall
				<i>Dactylis</i>	Orchard	
				<i>Festuca</i>	Meadow Fescue	
				<i>Lolium</i>	Ryegrass, Perennial	
<i>Poa</i>	Kentucky Blue Grass					
Triticeae		<i>Elymus</i>	Quack Grass	Spring – Summer Spring – Fall		
		<i>Triticum</i>	Wheat Pollen			
Panicoideae	Andropogoneae	<i>Sorghum</i> <i>Zea</i>	Johnson Corn Pollen	All year long Summer – Fall		
	Paniceae	<i>Paspalum</i>	Bahia	Spring – Fall		

Grass allergens that belong to the same taxonomic subfamily are easily interchangeable. In the common name column, the color indicates the species allergenicity:

● Mild allergen ● Moderate allergen ● Severe allergen
